

General Information on the **HMI** HOYME HAE - Hi-Efficiency Counter-Flow Air to Air Heat Exchanger

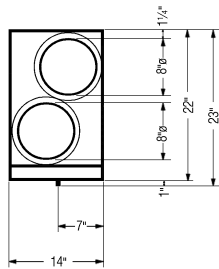

This air exchanger is designed to provide tempered fresh air indoors as stale air is ventilated outside. These Air Exchangers have a couple different configurations and are identified by specific numbers and letters.

There are two residential sizes and one commercial model.
Please refer to the Hoyme web at www.hoyme.com for more information.

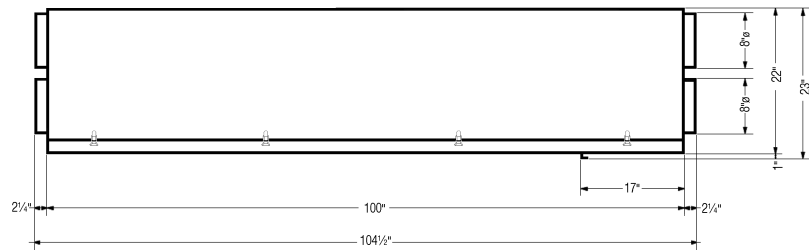

The I.D. for this HAE - Air Exchanger is:

HAE-1000-500

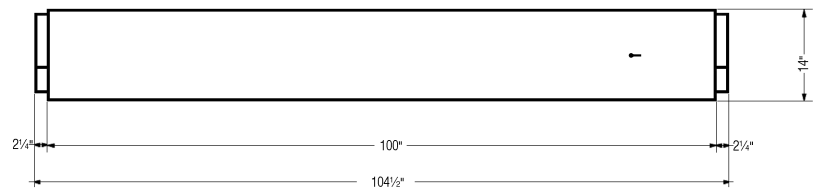

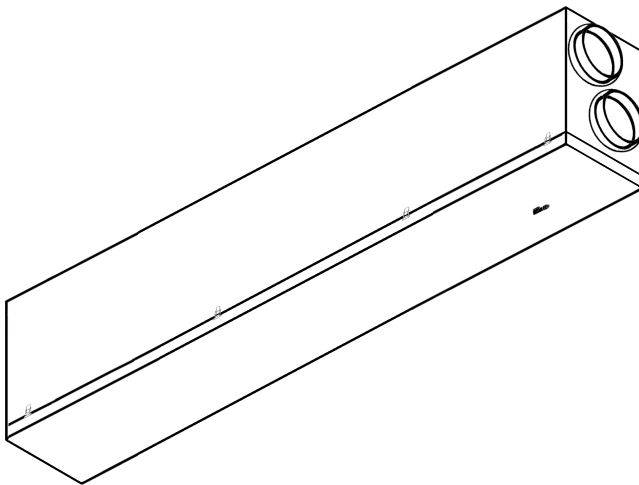

(This is the commercial Air Exchanger with ~600 CFM capacity)
